

To place Free Look Kits...Start a conversation with anyone...__

Ask them, "Do You Believe?"...

- You could run your existing car engine on pickle juice or coke?
- Get up to four times the mileage out of your engine for free?
- Magnets can be used to supply your home energy absolutely free?
- A noiseless and vibrationless jackhammer exists and is available?
- Corn fields can grow 17 feet tall (or 500 tomatoes on one plant?)
- An engine can run with the exhaust shut completely off?
- You could possibly earn a \$10,000/yr commission on a \$100 sale?
- You could drink bug poison without even getting sick?
- Paint an egg with house paint and put a 2,000F torch on it for 3 min?
- Paint a surface with a product that makes it impossible for graffiti?
- Get your clothes clean and never use laundry detergent ever again?
- Find all of the money any kid needs to go to any college for \$1,500?
- Make an in ground swimming pool for less than \$2,000?
- Water can be made to flow uphill without using any pumps?
- Water can be burned in place of natural gas for homes and business?
- A radiation free camera can see through walls or inside your body?
- Your engine can be modified to run on corn, birdseed, or McD fries?
- You can insulate your walls and ceilings by merely painting them?
- Fresh water can be extracted from the ocean at no operating cost?
- You can make electricity without even using any motor or generator?
- You are paying now for twice as much electricity as you are using?
- Our company forced Congress to deregulate the electric utilities?
- All radioactive waste can be neutralized. We do not have to bury it!
- Your garbage can be burned at home with no smoke or pollution!
- Big business has the best politicians, judges & media money can buy
- Discover a realistic plan to enable the people to take back America!

If you already know all this, then you do not need the Free Look Kit...

If you do not, then you can discover that this, and a whole lot more, is absolutely true. The neat thing is that you can become totally informed without having to buy or pay for anything. We will send all this in DVD and printed material absolutely free of any risk. We will pay the postage to you for a two week Free Look period and we will also pay all postage for you to return it. All you do is protect us from risk by securing the materials....

How is this risk free for the kit watcher?...

If you buy something over the internet or anywhere with your credit card and there is a merchant policy where you bought it that you can return it within two weeks of buying it and you do bring it back on time and the merchant will not credit your card, what would you do? Of course, you would contact the credit card company and refuse to pay for that item! As you know, the credit card company would confirm the policy and you would not have to pay for that transaction. Of course, something you may not know is that the merchant had better not let that happen often if he wants to remain a credit card merchant. Well, this is even better than that, because our published policy is that we will not even hit your card during the Free Look period (give them your url site to check that out.) The ONLY time we will hit your card is IF you do not let us have our materials back after the reasonable Free Look period is over! There is nothing to credit, because unless you fail to notify us to send a pre-postage paid envelope for you to return our materials on the two week date (or sooner), we will only then process your card assuming you want to keep the materials. There is no risk to you and if you keep your copy of the receipt when the kit arrives, and can prove you notified us for pickup by E-mail, fax, or postal confirmation, so, you have all the proof you need for the credit card company to protect you from us. We have been doing this with the same credit card companies for over a decade.

It's perfectly safe for you to become informed, and foolish for you not to...

If the statements asked you above are true and can be verified in this Free Look Kit, then I am sure you would agree that you would be foolish not to review it absolutely risk free! In fact, there is a plan to stop the suppression of technologies in America that will work if we can get enough people informed. You are about to witness first hand how bad the suppression has become. You may get a little bit angry when you see what advancements you are being denied (and we cannot even show all the ones we have.) There are all sorts of DVDs and Books, and catalogues in this kit, and we will warn you up front that the odds are that you will not want to part with it after you see what it is. The odds are that you will end up voluntarily forfeiting your security deposit and keeping this kit. That is why we have to secure it. It is far too expensive to just give away. Hundreds of thousands of people have already seen the materials and we hope to make that more like a million so we can instigate our plan. Please think this through and do what is good for you, your family, and our country. Together we can change this!
